J-KHAN
IMAGE PROCESSING

INTRODUCTION: J-KHAN's Image Processing Service

BETTER IMAGES means BETTER SALES!

We are here to help you sell more with better images of your products.
For online stores, images of the products matter as they are the only source for customers to see and feel the products.
Our team will do the re-touching so the images look professional and your products look great and appealing to customers, leading to better sales.

BETTER SALES with HALF THE COST!

Ongoing worries of all the retailers are the COSTS.
If costs increase more than the increase of sales, the profitability will go down and we all know what it means.
It costs less here to process the images than in your own country.
Salaries, tax, insurance and even office rent is lower here and this, of course, turns into lower costs per every image processed.
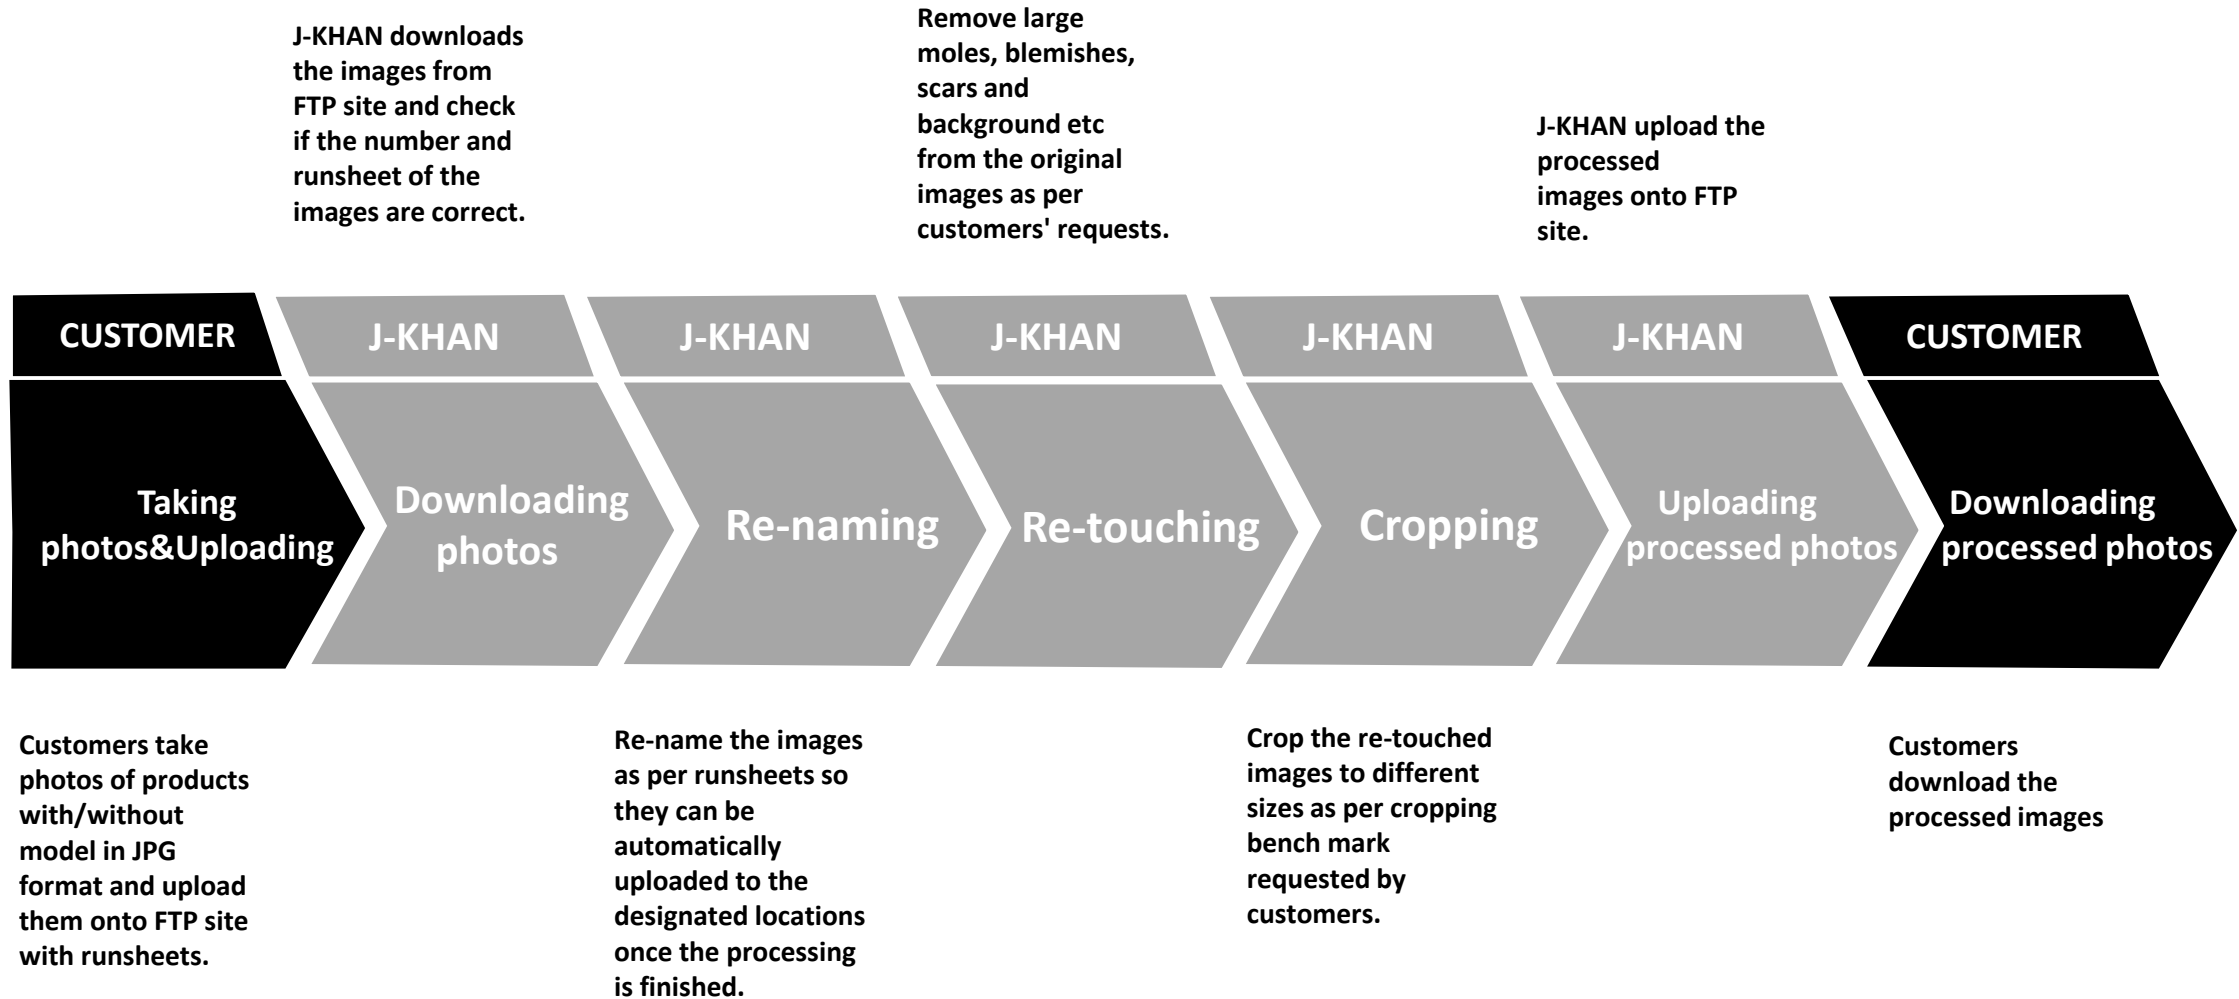

LOWER COST but FASTER TURNAROUND!

Speed is the key to the success of the businesses. This is especially true in fashion industry.
Good images at half the cost would be nothing, if it takes forever to get them.
Our team works around the clock to make sure you get your images in 24hours.

OUR WORK FLOW

J-KHAN downloads the images from FTP site and check if the number and runsheet of the images are correct.

Remove large moles, blemishes, scars and background etc from the original images as per customers' requests.

J-KHAN upload the processed images onto FTP site.

CUSTOMER	J-KHAN	J-KHAN	J-KHAN	J-KHAN	J-KHAN	CUSTOMER
Taking photos&Uploading	Downloading photos	Re-naming	Re-touching	Cropping	Uploading processed photos	Downloading processed photos

Customers take photos of products with/without model in JPG format and upload them onto FTP site with runsheets.

Re-name the images as per runsheets so they can be automatically uploaded to the designated locations once the processing is finished.

Crop the re-touched images to different sizes as per cropping bench mark requested by customers.

Customers download the processed images
